“ I taught duwan math for 2 years at FMS -- Kind hearted, would do anything for classmates and teachers. We had so many great moments in my class the first year bc I was filming to get my national board certification in 2001 and duwan was in that class and on the front row . His lil legs sticking out of his desk . I was praised in videos I sent in about how involved the class was but especially him ... I loved his sense of humor ..he loved to graph in math ...I could teach him algebra even if he didn't understand his division he could do my algebra equations because in my class he paid attention he didn't need to remember 5th grade math he remembered what I taught and it showed his motivation and willingness to try and that was all I asked try his best and he did ❤️ one of my most memorable students ever 100”
